

## Credo Audio Switzerland - HIGH-END 2018 Press Release

As in previous years we will demonstrate our products in room **Atrium 4.2 F231f**.

A special edition of our **EV Reference ONE** loudspeaker, that had its premier in 2017 also in Munich, will play in our room. **Michael Kraske developed** this model around the idea of a wide-band, closed cabinet speaker. Knowing about the tonal balance and richness that a full-range speaker can reproduce, not willing to accept the lack of bass and presence of high percentage of distortion.

So the paper-cone, symmetrical drive mid-woofer is accompanied by a 1" tweeter and 12" long-throw subwoofer. The mid-woofers slices-cone prevents effectively cone breakups, so it is playing from 50Hz and blending over gently to the tweeter creating **a speaker with full-range characteristic** - but with punchy bass down to 25 Hz and extended treble smooth as silk. As always with Credo Audio speakers, we achieved linear impedance and a high efficiency (of 87.6 dB), making it an easy load for amplifiers.

An other highlight in our room will be the **VPI Avenger** reference turntable, featuring a brand new **Fatboy (Gimbal) tonearm**, as well as the unipivot JMW 3D arms. These will be equipped with **Van den Hul „Colibri Master Signature“** and **„The Crimson XGW“** cartridges. Completed is the duo with a **KISEKI Purple Heart N.S.**
